## LuxaLight LED-strip Green Protected (24 Volt, 140 LEDs, 2835, IP64)

**LS24G140X2835PLX**

**Version: 2025-05-08.7**

## Product description

The **LuxaLight Professional LED strip in green (517 nm)** is designed for applications where vibrant, highly visible yellow lighting is essential. With a specific wavelength of 517 nanometers, this LED strip emits a pure, saturated yellow light that enhances visual impact, making it ideal for decorative, commercial, safety, and architectural lighting.

### Key Features:

- **517 nm Green Wavelength:** Emits a clear, bright green light perfect for accent, signal, and feature lighting applications.
- **140 pcs 2835 LEDs per Meter:** Delivers high light density and uniform illumination for consistent brightness along the strip.
- **Flexible Design:** Allows easy integration into various lighting configurations including profiles, fixtures, or custom lighting systems.
- **3 oz/ft² PCB Thickness:** Ensures robust thermal management and mechanical strength, enhancing durability and reliability.
- **Passive Cooling Required:** Should be used with proper heat dissipation to ensure long-term performance.
- **3M 4905 VHB Tape:** Offers strong adhesion to a wide variety of surfaces, simplifying permanent installations.

### Applications:

- **Architectural and Accent Lighting:** Perfect for outlining building features or adding colorful highlights to structures and interiors.
- **Retail and Visual Merchandising:** Draws attention to specific products or zones in shops and showrooms.
- **Entertainment and Events:** Ideal for stages, exhibitions, and themed lighting where bold colors enhance the atmosphere.
- **Safety and Warning Lighting:** Green is commonly used for cautionary and signal lighting in industrial or public spaces.
- **Signage and Wayfinding:** Enhances visibility and legibility in indoor and outdoor signage systems.

### Benefits:

- **Green Output (517 nm):** Produces a distinct and eye-catching yellow color for high-visibility applications.
- **Uniform Illumination:** With 140 LEDs per meter, the strip ensures even light distribution without dark spots.
- **Flexible and Customizable:** Easily integrates into a range of lighting designs thanks to its flexible construction.
- **Reliable and Energy-Efficient:** Uses efficient LED technology that delivers stable performance with reduced energy consumption.
- **Easy Installation:** Strong adhesive backing with 3M VHB tape enables fast, reliable mounting on various surfaces.
- **Durable Construction:** Reinforced PCB ensures longevity, especially when used with proper thermal management.
