LuxaLight Industrial LED Fixture Opaline cover Neutral White 4800k 24.2x16mm (24 Volt, 2835, IP64)

LF-24-4800k-24.2X16-OC

Version: 2025-07-10.2

Product description

The **LuxaLight Industrial LED Fixture (4800K)** is designed as a high-quality lighting component for applications requiring high light output, precision, and excellent color rendering. This LED fixture consists of **54 LEDs with 4200K** and **54 LEDs with 5700K**, resulting in a total color temperature of **4800K**. This balanced spectrum offers an ideal solution for **horticulture**, **plant research**, and **scientific environments**, where a full spectrum of light is essential for photosynthesis and plant growth.

Key Features:

- **4800K Color Temperature:** The combination of 4200K and 5700K LEDs creates a balanced 4800K spectrum, offering neutral white light that is ideal for applications in **horticulture** and **plant research**. This spectrum is optimized for plant growth and supports effective photosynthesis.
- **High PPFD Output (3226 $\mu\text{mol}/\text{m}^2/\text{s}$ at 5 cm):** The LED fixture produces high light intensity, ideal for promoting photosynthesis and healthy plant growth. This makes it an excellent choice for **scientific research** and other related applications requiring powerful lighting.
- **Aluminum Housing for Heat Management:** The fixture is made from **aluminum**, which ensures efficient heat dissipation and optimal performance, even during extended use. This contributes to the long lifespan and performance of the fixture.
- **Opal Cover for Mechanical Protection and Light Spread:** The **opal cover** protects the LEDs from mechanical damage and ensures even light spread, enhancing the fixture's durability and reliability.
- **Fully Finished Product:** The LED fixture is a **fully finished product**, ready for direct integration into systems or installations. This provides convenience and saves time when implementing applications in **horticulture**, **plant research**, or other light-related environments.
- **Real-Time Temperature Monitoring via NTC Sensor (in combination with Pollux Industry):** The integrated **NTC sensor** ensures continuous temperature measurement and adjustment. When used in combination with **Pollux Industry**, the sensor maintains optimal operating conditions, preventing overheating and ensuring the LED fixture consistently performs at its best. This combination maximizes output and contributes to reliable, long-lasting results.

Applications:

- **Horticulture and Plant Lighting:** The 4800K color temperature and high PPFD output make this LED fixture ideal for **horticultural** applications, where a broad light spectrum is required to promote photosynthesis. This makes the fixture perfect for **growing facilities**, **vertical farming**, and **commercial cultivation**.
- **Plant Research and Growth Optimization:** With its balanced light spectrum, the LED fixture is ideal for scientific research into plant growth, photosynthesis, and other biological processes influenced by light intensity and quality.
- **Scientific Research Environments:** The LED fixture provides powerful lighting for controlled research environments, where specific light spectrums and high PPFD output are essential for studying plant growth and photosynthesis in scientific applications.
- **Quality Control in Agriculture and Horticulture:** The LED fixture is also suitable for quality control of plants, crops, or other biological products in **agriculture** and **horticulture**, offering consistent lighting that accurately simulates growth conditions.

Benefits:

- **Full Spectrum Lighting:** The combination of **4200K** and **5700K** LEDs provides a broad spectrum, delivering powerful lighting for photosynthesis and plant growth, ideal for **horticulture** and **research**.
- **High PPFD Output:** The high PPFD output of **3226 $\mu\text{mol}/\text{m}^2/\text{s}$ at 5 cm** ensures sufficient light intensity, promoting healthy plant growth, especially in **scientific research** and commercial applications.
- **Integration Flexibility:** The LED fixture can be easily integrated into existing systems or enclosures, offering flexibility for applications in **growing facilities**, **vertical farming**, **laboratories**, and other **horticulture and research applications**.
- **Efficient Performance:** The LED fixture provides reliable and efficient performance with consistent light output, making it ideal for intensive growth applications like **horticulture** and **scientific research**, where long-lasting and dependable lighting is required.
- **Real-Time Temperature Monitoring for Consistent Performance:** The integrated **NTC sensor** works in combination with **Pollux Industry**, ensuring continuous temperature monitoring, preventing overheating, and maintaining optimal performance over time. This contributes to maximizing the output of the LED fixture, essential for maintaining high performance in a dynamic environment.

Technical specifications

General

Brand	LuxaLight
Application	Food Inspection (Agro-Food) Hyper - spectral Imaging Line Scan Cameras Machine Vision
LED type	2835
Material	Aluminum
Dimensions	220 × 24,2 × 16 mm
Mounting	Surface mounted
Cover type	PMMA opal
LEDs per piece	108.00

Lighting

Color temperature	4800 K
Beam angle	120 °
